

Polycom Healthcare Solutions

Polycom healthcare solutions deliver more than 25,000 patient encounters per month worldwide—saving time, money and lives.

Healthcare

The areas of healthcare that have technology-enabled communication needs are diverse, including critical patient care, the day-to-day business, medical education and community outreach.

Telemedicine

Telemedicine doctors can connect securely and easily with patients from their computers, personal devices or a standards-based video systems. HD audio and video help simulate in-person experiences for telepsychiatry, speech therapy, telestroke exams and many other applications. Integration of Polycom solutions into EHR systems, such as EPIC, allows doctors or nurses to chart directly during a remote session.

Consultation

Physicians and other caregivers can join with remote medical staff and patients to provide the highest quality of care.

Continuing medical education (CME)

Staff can take advantage of earning CME credits through distance education.

Administration

From HR, board meetings and more, staff benefit from the highest quality audio and video available. Everyone also can share content easily with all participants.

Polycom healthcare product showcase

Benefits

- Expanded specialist reach to rural pediatric patients
- Reduced travel time and costs for patients
- Anesthesiologist collaboration and training

“When we use Polycom, we remove the distance barrier, so I’m able to provide the same level of care to patients who live four hours away as those who live forty minutes away. And this technology allows me to be in more than one place at a time.”

— Dr. Shayla Sullivant, Child and Adolescent Psychiatrist, Children’s Mercy Hospitals and Clinics
