Polycom® Touch Control

Telepresence at your fingertips

The intuitive solution for accelerating Unified Communications (UC) and video collaboration throughout your organization

The Polycom® Touch Control graphical interface solution is a highly-intuitive touch screen device that enables users to quickly initiate video conferences, free from complicated interfaces or technical support. By expanding user adoption of collaboration and allowing participants to focus on their meeting, the Polycom Touch Control solution accelerates your return on investment in telepresence and video solutions while making your organization more productive and efficient.

Conference with confidence

The Polycom Touch Control interface is ideal for enterprises, educational institutions, healthcare organizations, and any other group requiring faster and more efficient real-time collaboration. Featuring a high-resolution display that provides simplified navigation and menu selection, the Polycom Touch Control solution allows users to control all aspects of their conference experience, including finding colleagues, placing calls and sharing content.

Users can easily connect to one another using a shared address book, on-screen keypad, and calendar entry. For quick access to room information, the Polycom Touch Control communicates with the Polycom HDX® and RealPresence® Group Series room telepresence solution which can be integrated with Microsoft® Exchange software to provide complete location detail.

The Polycom Touch Control offers multiple options for sharing content, enabling users to share their PC or MAC desktop via direct USB connection to the Touch Control, via VGA/DVI connection to the video codec or share content directly from USB flash drive connected to the Touch Control.

Easy to use and deploy

The Polycom Touch Control device leverages Power Over Ethernet (PoE) for clutter-free connectivity. Individual Polycom Touch Control devices can be easily paired and dedicated to any network-connected HDX or RealPresence® Group Series room telepresence system. Polycom Touch Control devices can be deployed in an identical configuration to provide users with a consistent experience regardless of environment, or devices can be individually tailored to unique workflows.

Benefits

- Reduced video conferencing learning curve and increased user adoption through a highly intuitive interface
- Improved user experiences through one-touch control
- Collaboration through seamless integration with Polycom HDX®, RealPresence® Group Series room telepresence systems, Polycom RMX® platforms, Polycom SoundStructure® systems, and Polycom OTX™, RPX™ and ATX™ immersive telepresence solutions
Product Specifications

Package includes

Compatible Systems
- HDX 4500, 6000, 7000, 8000 & 9000
- RealPresence Group 300, 500 and 700

Usability
- Touch control on 7-inch screen
- Tap and touch control to access call controls and administrative menus
- SoundStructure Mode
  - Dialing
  - Volume Controls
- Intuitive menus
  - Layout Manager
  - Camera Control
  - Dialing & Directory
  - Administration

Technology
- Capacitive touch screen
- Direct API command through network

Electrical
Power Over Ethernet (PoE) required

Physical Characteristics
- Polycom Touch Control with removable stand
- 7.25” (W) x 5.5” (D) x 1 – 1.75” (H)

Warranty
- One-year return to factory parts and labor
- 90-day software warranty
- Service Contract Required

Technical Documentation
- Award-winning documentation for setting up, maintaining, and using the system
- Available at www.polycom.com/videodocumentation
