

## Premium Audio Collaboration Service

“Who just joined?” Now you’ll know.

ZipDX provides premium audio conferencing.

Weekly sales calls, team meetings, and project reviews are easier to manage, and sound better with ZipDX. If you value the time and productivity of team members around the world, choose ZipDX.

**Business-Grade Conferencing:** ZipDX provides much more than traditional services. When you sign up as the ZipDX host, you decide which features are activated and how the conference will start and end. When you use an online calendar program to invite ZipDX along with your other guests, the system learns about the participants and enables them to set up their own profiles. When it’s time for the call, ZipDX can automatically dial each participant, or recognize them as they dial in, eliminating the need for codes and ensuring call security.

**Wideband Audio:** Any participant with a wideband-capable telephone client, including IP phones, soft-phones, and special speakerphones, can hear and speak in the highest quality audio.

**Customer Portal & Dashboard:** The ZipDX interactive Web site allows for customization, real-time monitoring, caller interaction and generates a conference summary. The ZipDX accounting system lets administrators segregate calls by department, and view call records online.

**Worldwide Access:** ZipDX offers toll-free access in the United States and Canada, plus local access numbers in several other countries. Or, ZipDX will dial out to any number worldwide. VoIP clients can connect over a broadband connection via SIP.

Conference: Budget Review						Close				
Vote Tally:										
0	1	2	3	4	5	6	7	8	9	
0	2	1	1	2	0	0	0	1	0

Debbie Dougherty				4						
Barry Bowman				3						
Alice Anderson				8						
Frank Foster				1						
Eunice Eastman				2						
David Frankel				4						
Chuck Charleston				1						

### The ZipDX Guarantee:

- **On-Time Conferencing:** With calendar integration and dial-out capability, ZipDX participants get called just ahead of the start time, allowing us to guarantee that you won't waste time waiting for latecomers. If you do, drop us a note, and we'll credit your account for the wasted minutes.
- **Crystal Clear Audio:** Because ZipDX supports wideband, any appropriately equipped participant will enjoy enhanced audio – which is so important in a conferencing situation. Plus, with the ZipDX dashboard controls, the host can instantly squelch noisy participants or other interfering noises. If you're using wideband audio and experience noise disruptions, let us know; we'll credit you for the minutes.

ZipDX: Because your time is worth it!

## The Perfect Complement to Polycom HD Voice™ Technology

ZipDX is the first service designed from the ground up to work with the full suite of Polycom HD Voice™ products. In a conference room, an office, or on the go with a laptop, ZipDX gives you the best possible conferencing experience on your Polycom phone. ZipDX supports clients connecting in wideband or traditional narrowband, via the PSTN or SIP.

	Narrowband	HDvoice
PSTN	Soundstation Wireline Mobile	VTX-1000
IP	IP-4000 Other SIP Clients	IP 650, 550, C100

Get instant access to ZipDX services with one button on the Polycom IP-550 or 650.

View the powerful ZipDX dashboard directly on the phone display; hosts can view and manipulate the conference easily right on the phone.

The participant list continuously updates, showing who is joining or leaving the call, as well as who is talking and who has raised their hand. A host can mute or disconnect individual participants, and can dial-out to anywhere in the world.
