

# SECURETEST

## Certificate of Testing

This is to certify that

**Polycom**

have had certain Internet Protocol (IP) devices  
tested according to the guidelines laid down by C.E.S.G.

UK Government National Technical Authority for Information Assurance

Scope of Test

**Polycom Video Border Proxy**

Testing carried out by

**Thomas Beale**

Validated by

**Rob Pope**

C.E.S.G. ACCREDITED CHECK TEAM LEADER

Dated

**17 March 2008**

### IMPORTANT NOTES:

Penetration testing provides a 'snapshot in time' of the security profile of the devices under test. System configurations change, and new vulnerabilities are discovered frequently. Testing does not guarantee that a hacking incident may not occur in the future and we strongly advise the implementation of a regular testing programme whether it be achieved through penetration testing, automated vulnerability assessment, or a combination of both.
